CAREER OBJECTIVE

Aspiring Software Developer with a solid foundation in Data Structures and Algorithms and hands-on experience in MERN stack development. Seeking an opportunity to build efficient, scalable web applications while continuously improving problem-solving skills and contributing to impactful software solutions.

EDUCATION

B.Tech Computer Science And Business Systems

K.S. Rangasamy College of Technology, Namakkal, TamilNadu **CGPA : 8.1 III-semester**
2024

HSC (II Group)

Vanmathi Matric Hr. Sce. School, Kallakurichi, TamilNadu **74% -153 Cutoff**

SSLC

Government Hr. Sce. School, Sellampattu, Kallakurichi, TamilNadu **71%**
2022

TECHNICAL SKILLS

- **Programming Language:** JAVA, Python, C, JavaScript, HTML, CSS
- **Web Development :** MERN Stack, Full Stack-JAVA
- **Dev Tools :** GitHub, VS Code, Unity, Antigravity, Figma
- **Data :** Excel, MS Word, Power Point
- **Designing Tools :** Canva, Davinci Resolve, After Effect, Illustrator, Photoshop, Blunder

INTERNSHIP EXPERIENCE

- **Eduskills – Celonis Process Mining Virtual Internship** July 2025 – Spm 2024
Completed hands-on training in process mining techniques, focusing on analyzing and optimizing business processes using event logs. Gained experience in process discovery, conformance checking, and performance analysis using industry tools. Applied data preprocessing and visualization methods to identify inefficiencies and improve workflow optimization.
- **SiDRA Hub – Tech Associate Internship (Inaiyam Innovations)** Dec 2025 – Feb 2026
Completed an on-site internship as a Tech Associate, working on real-time AgriTech projects focused on digital agriculture and data-driven advisory systems. Actively contributed to field coordination, system implementation, and community engagement to support farmers with technology-based solutions. Gained practical experience in solving real-world problems, collaborating with teams, and applying technical skills in a live project environment.

PROJECTS

- **AI Code Visualizer – MERN-Based Application**

Developed a full-stack web application using MongoDB, Express.js, React.js, and Node.js to visualize code execution step-by-step. Integrated AI-based logic to analyze and represent algorithms dynamically. Implemented user-friendly interfaces, real-time code rendering, and interactive visualizations to enhance understanding of complex programming concepts.

- **AR-Based Crop Advisory System using CNN and Geolocation Algorithm**

Developed an augmented reality-based application to provide real-time crop advisory solutions. Utilized Convolutional Neural Networks (CNN) for crop disease detection and integrated geolocation algorithms to deliver location-based recommendations. Implemented interactive AR features to enhance user experience and support farmers with accurate, data-driven insights.

- **Bus Booking System (Full Stack Web Application)**

Developed a full-stack Bus Booking System using Java, HTML, CSS, JavaScript, and MySQL. Implemented user registration, login, bus search, seat booking, and ticket management functionalities. Designed a responsive user interface and integrated a MySQL database for efficient data storage and retrieval. Built backend modules for booking management, user authentication, and real-time seat availability tracking.

CODING PROFILES

- **LeetCode** – Active problem solver (15+ Days Coding Streak)
- **GitHub** – Multiple deployed projects (200+ Contribution)

VOLENTEERING WORKS

- **Talent Quest for India (TQI)**

Mentored students from Grades 9–12 through school-based cluster classes and conducted educational and motivational sessions. Provided phone mentoring to students from Grades 6–12, offering academic guidance, career awareness, and personal development support.

- **Service Motto Volunteers (SMV)**

Lead and coordinate the media team for volunteer activities and events. Guide team members in content creation, video production, and event documentation while contributing to community service initiatives and student engagement programs.

- **Atchayam Trust**

Supported the rehabilitation and care of homeless and vulnerable individuals, including elderly and young people rescued from streets. Participated in community service activities aimed at improving well-being, promoting social reintegration, and helping beneficiaries rebuild their lives.
